2.4 Certificate of Engineering Practice

2.5 Our Speciality

Balanced Construction LLC (BAC) are expert in Design, Fabrication, Supply and Installation of any additional structures/ works to existing facilities such as shown below, which requires close coordination with Client, Consultants, and Authorities and we can accomplish the task accurately with least number of submission, with our vast experience in this field for items such as :

- Mezzanine Structures
- Support Structures (Crane Support, Silos Structures, etc.,)
- Steel Additions (Canopies, Fascia, etc.,)

3.1 Quality Policy

We strive to create a quality work environment in BAC as a prerequisite for providing excellent services to the clients.

We endeavor to see that our project deliverables consistently meet and exceed the client expectations. We shall seek every possible way of continuous improvements of work processes by adopting documented methodologies and review of results for each activity.

We deem that the time of delivery is a very important quality attribute of the service that we provide. Our success is founded on quality and clarity in communications with the customers and within the organization.

<u>3.2 Health Safety & Environment Policy</u>

BAC has a well-documented HSE Policy that ensures operational safety, safety of work and protection of environment. The company management is directly responsible for the safety at work. A system to disseminate the rules among the employees and sub-contractor staff is in place to ensure implementation of the policy. BAC is committed to successful execution of all projects with accident free record.

The BAC HSE policy emphasizes on the following aspects.

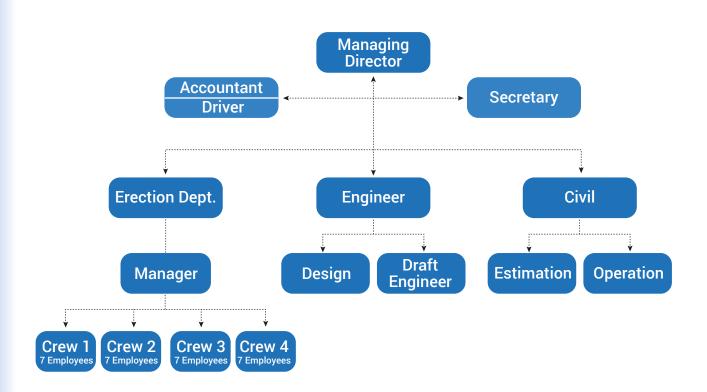

- Significance of conformance with HSE policy and related procedures
- The importance of health and safety risks, actual or potential, of all work activities
- Importance of using Personal Protective Equipment at work
- · Maintenance of tidiness of work place
- The advantages of benefits of improved personal performance
- Emergency procedures and response requirements
- The potential consequences of departure from specified operating procedures

The resulting system:

- Ensures the well-being of all employees by helping them to take care of themselves first
- Promotes a work place that protects the health of all people working around which includes employees, subcontractors and the community surrounding the site
- · Emphasizes prevention through induction courses
- Provides medical insurance plans

This system considers local conditions and complies with the health laws and regulations applicable in the UAE
